

# Protecto-Stonegard

PU based Coatings for Stone/Brick Facades

## PRODUCT DATASHEET

### ► Description

Protecto-Stonegard coatings form a transparent, elastic, waterproof, abrasion resistant, anti fungal, protective film when applied over stone or brick facades. It helps seal the porosity of the stone and protects the surface from erosion as well as the harmful effects of environmental pollution. Both glossy and matte finishes are available.

### ► Application

The surface should be clean and free of all oily impurities and dirt. Spray or brush on Protecto-Stonegard (glossy or matte) over the surface. The coating will be dry within 2-3 hours depending on the ambient temperature and relative humidity. Apply more coats as per requirement keeping a gap of 2-3 hours between coats.

### ► Uses

These coatings can be used to protect a wide range of bricks and stones including marbles and granites. They are highly abrasion and scratch resistant and have very good resistance to fungi and bacteria. They have good stain resistance and are easy to clean and maintain.

## ► Properties

Colour	Milky coating which becomes colourless on drying
Coverage	3-10 sq.m/kg depending on the porosity of the surface.
Drying Time (25° C)	2 -3 hours
Flexibility	Good
Abrasion Resistance	Good
UV Resistance	Excellent
Fungus & Bacteria Resistance	Excellent

## ► Storage and Precautions

Protecto-Stonegard should be stored in a cool and dry area. It can be stored for 12 months in its original, unopened container. While handling, all contact with eyes, skin, and clothes should be avoided. Implements used for application of Protecto-Stonegard should be cleaned with excess water. In case of accidental swallowing, drink large quantities of water and seek medical help. In case of any splashing in the eye, rinse with cold running water for 10-15 minutes
